

Dynamicweb eCommerce

Dynamicweb eCommerce gives you webshop and website in one solution, which you can customise both when it comes to design and other business needs. Dynamicweb has standard integration to e-economic and standard add on modules for integration to Microsoft Dynamics CRM, AX and NAV. Dynamicweb supports a number of international payment gateways such as DIBS, PayPal and e-pay.

Promote cross-selling and additional sales by showing related products, most popular products and products purchased by other customers. Let your customers rate and compare products, and customise check-out and order flow. Optimise your daily tasks by processing several orders simultaneously and approving payments directly in the payment gateway.

Basic

Maintain up to 1,000 products and create advanced price and discount structures in Dynamicweb eCommerce Basic. Display inventory based on realtime data directly in the webshop. Give the customer a better buying experience with track and trace and automatically generated order status emails.

€ 1,500

Professional

With Dynamicweb eCommerce Professional you can handle up to 10,000 products, which can also be combined as virtual products. Filter based searches lets the customer choose products according to his/her needs. If you have Extranet on your solution, you can create loyalty programmes and dealer networks.

€ 3,500

Enterprise

Handle several shops in one Dynamicweb eCommerce Enterprise solution, where update and maintenance are coordinated from one location. The products are automatically related to the correct accounts. You can easily keep track of languages, shipping, payment gateways, currencies and VAT even in large international solutions.

€ 5,500
